

A little about MicroWorks

MicroWorks, Inc. is a Microbiological consulting and training firm that was formed on the basis that pharmaceutical manufacturers and suppliers do not always have the proper amount of personnel to do all of the studies that need to be done within the facility.

MicroWorks, Inc. has found its market in being a hands-on consulting firm. We are not a company that tells clients what they need to do, but a company that does projects for our clients.

MicroWorks has expertise in all areas of Microbiology including environmental monitoring program design, new method development, auditing, equipment validation, cleaning validation program design and regulatory follow-up.

MicroWorks Training Modules

MicroWorks, Inc

Your Gateway to information

Tel: 219.661.8620

*Do you need
qualified technical
trainers?*

cGMP's, General Manufacturing, and Emergency Procedures are the types of instruction that most training departments are qualified to teach to your laboratory personnel. How about Gram Staining, Endotoxin Testing, Identification of Microorganisms, or Advanced Microbiology?

MicroWorks has taught many courses dealing with life in the microbiology laboratory for leading training organizations throughout the country. We have developed a training Module Program that can be presented at your facility at a reasonable cost. Train the whole department for the cost of sending a single person to a training session for one day. You pick the time and the day that suits your schedule. Modules can be done off the shelf or custom designed to your facility.

MODULES

1. ENVIRONMENTAL MONITORING-BASIC	3 HRS
2. ENVIRONMENTAL MONITORING-ADVANCED	5 HRS
3. MICROBIAL LIMITS-BASIC	1 HR
4. MICROBIAL LIMITS-ADVANCED	2 HRS
5. STERILITY TESTING-BASIC	1 HR
6. STERILITY TESTING-ADVANCED	2 HR
7. REGULATION AFFECTING THE MICROBIOLOGY LABORTORY	3 HRS
8. MICROBIOLOGY TESTING FOR EQUIPMENT VALIDATION IN THE PHARMACEUTICAL INDUSTRY	6 HRS
9. ENDOTOXIN TESTING	3 HRS
10. PREPARING FOR AN FDA INSPECTION	2 HRS
11. BIOBURDEN TESTING	2 HRS
12. VALIDATION OF MICROBIOLOGY METHODS IN THE PHARMACEUTICAL INDUSTRY	8 HRS
13. CGMPs FOR THE PHARMACEUTICAL INDUSTRY	2 HRS
14. CLEANING VALIDATION-CHEMICAL AND MICROBIOLOGICAL CONSIDERATIONS	8 HRS
15. BASIC MICROBIOLOGY	8 HRS
16. WATER TESTING	1 HR
17. IDENTIFICATION OF MICROORGANISMS	2 HRS

Design your training to fit your Department

All of the training materials required for the courses are included for training up to 20 persons per class. Courses are taught interactively so attendees get a hands on learning experience as opposed to lecture style training.

MicroWorks training modules are developed to teach your staff the procedures that are necessary to perform the tasks of any Microbiology laboratory. We can also develop specialized programs to suit your needs.

MicroWorks stays current with the latest agency trends and policies. The sessions are not filled with theory and unrealistic strategies, but real world tips and tricks that you can use every day.

Attendees are encouraged to get involved with the class by asking many questions regarding specific issues that they deal with while performing their everyday tasks.

Call to discuss your training needs and for pricing.
